

**BTB-S104-FM**

**FTTH Broadstar Terminal Box**

**Tech Sheet**

## 1.0 Product Description

This terminal box is used in the end termination of residential buildings and villas, to fix and splice fiber connections. The BTB-S104FM allows the operator flexibility when deploying RFoG or PON 1x32 architecture. The network operator may adapt a variety of optical connection styles, insuring effective fiber management of the network.

## 2.0 Product Features

- \* Self-latching, hinged cover design
- \* Weather-resistant/high impact thermoplastic alloy
- \* FTTx splice tray included
- \* Self-sealing individual entrance ports prevent water and insects from entering the NID
- \* Optional custom logo
- \* 3/8" Hex head fastener for securing the cover
- \* **Specify Connector Type: SC, FC, ST, LC and Termination of APC, UPC, PC**

## 3.0

BroadStar Part Number	BTB-S104-FM
Size(mm) W*D*H	210*140*40
Cable Diameter (mm)	Φ7~Φ10
Cable Entry	1
Max. Capacity of Splice	4 (single fiber)
